Codice Bracco superato: 

Materiale: 

Fustella 

1 

questa è una stampa a 600 dpi ottenuta con coloria base acqua CMYK. Definizione e colori non riflettono il risultato finale della produzione stampata.

RETRO 

10 hours after injection, almost all occurring within 24 hours. They are usually mild to moderate 

Pediatric Use 

evidence of genetic toxicity was obtained 

Drug/Laboratory Test Interactions 

AND ADMINISTRATION, Drug Incompatibilities 

Drug Interactions 

1. Inform your physician if you are pregnant. 

always be considered. To avoid bacterial contamination during spinal puncture, a sterile field 

homozygous sickle cell disease, or known thyroid disorder. 

Nervous none emotional stress 

A dose of 3000 mgI in adults and 2400 mgI in children is sufficient for most myelographic 

OVERDOSAGE 

Peripheral neuropathies 

transitory weakness in the leg or ocular muscles has been reported. Peripheral neuropathies 

intracranial entry. Transitory EEG changes occur and usually take the form of slow wave activity. 

DOSAGE AND ADMINISTRATION 

entry of a large portion of the medium. 

Diagnosis of ischemic stroke. This test may also be used to determine the degree of contrast 

washes.
